## Professional Experience

### NetSuite Engineer - Porch.com, Seattle, WA

Oct 2022 – Nov 2024

- Developed scripted reports consolidated into PDF, Excel, or CSV formats and scheduled for automated email distribution.
- Built a custom payment portal, allowing invoiced NetSuite customers to access open invoices, download PDFs, update credit card details, and make payments.
- Integrated Authorize.net for scheduled batch processing and reconciliations.
- Designed tools for NetSuite Electronic Payments using ISO 20022 XML files.
- Created a financial bank parser module for reconciliation using Boomi and REST APIs.
- Integrated NetSuite API with JWT and OAuth 2.0/1.0 for analytics solutions..

### NetSuite Engineer - Bird, Santa Monica, CA

May 2020 – Present

- Streamlined inventory tracking between physical locations and automated reconciliation of quantity discrepancies using RESTlets and Celigo.
- Automated intercompany transactions and designed interfaces between NetSuite and internal reporting applications.
- Enhanced Advanced Approvals and validated item costs by location for intercompany transfers..

### Sr. NetSuite Developer - Grove Collaborative, San Francisco, CA

Jun 2019 – Apr 2020

- Built custom tools for reconciling inventory across internal and third-party systems.
- Automated receipt generation and inventory transfers using SuiteScript and Dell Boomi.
- Created data pipelines for operational metrics such as inventory counts, revenue recognition, and banking data analysis..

### NetSuite Developer - CarGurus, Cambridge, MA

Sep 2017 – Jun 2019

- Implemented Advanced Revenue Recognition and synchronized revenue data with third-party applications.
- Automated integrations between NetSuite, Concur, and Zuora using Dell Boomi APIs.
- Developed a custom ACH module for electronic payments and enhanced SOX compliance by implementing approval processes..

### NetSuite Admin - Harvest Power, Waltham, MA

Jul 2015 – Sep 2017

- Designed custom NetSuite business processes to synchronize data, validate user input, and enforce rules for data integrity.
- Developed a "Tax Automation" module for compliance with the Canadian Ministry of Finance.
- Built a vendor portal to provide real-time inventory visibility..
